

AIM:

To design and understand the cloud architecture for the project.

PROCEDURE:

1. Key components:

- Web application
- Backend Services
- Cloud Platform
- Database (Azure SQL Database)
- Storage (Azure Blob Storage)

2. Diagram

User → Web Application → Backend → Cloud Database →
Cloud Storage

3. Review

- Verify Data flow
- Ensure security & scalability

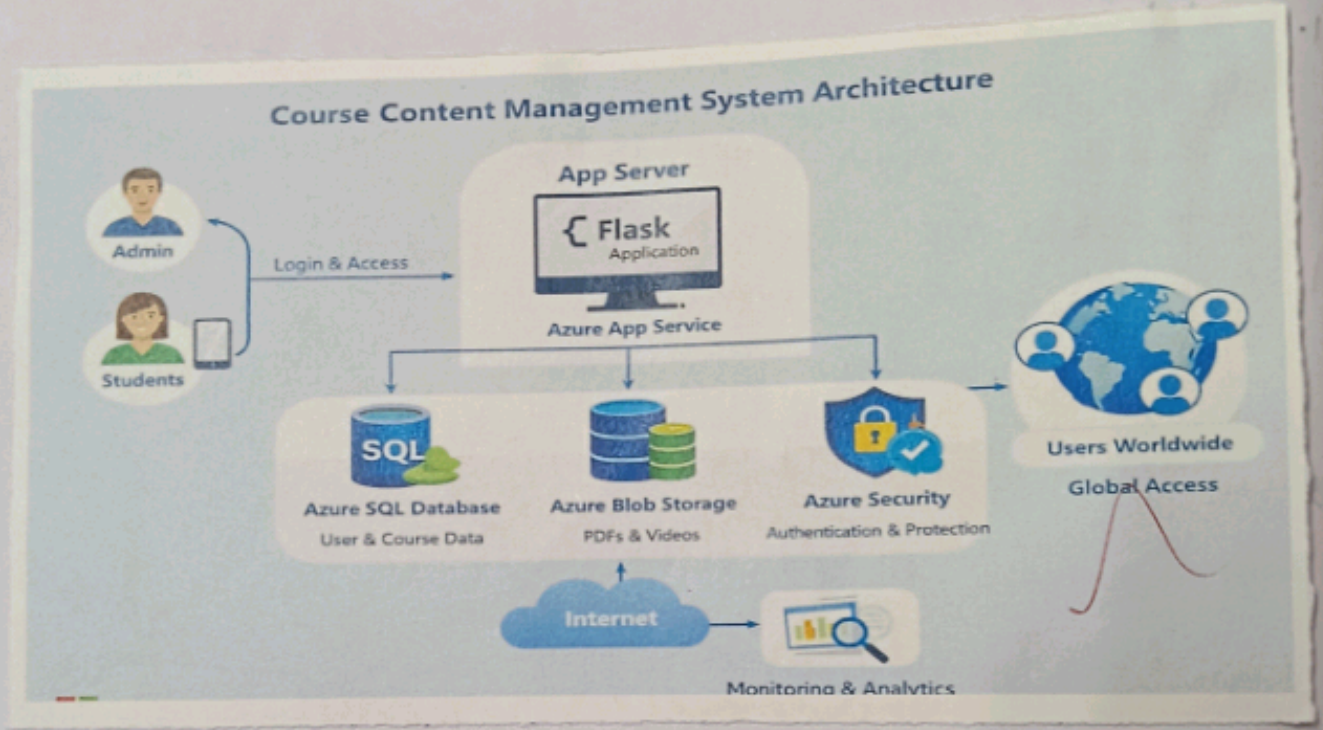

RESULT:

Thus, the architecture diagram for the project was designed and verified successfully.
